List of Tables and Figures

1. Foundations
   1.1 Problem Statement
   1.2 A Note on Returns
   1.3 The Simugram
   1.4 Role of the Geometric Index
   1.5 Market Performance and Outperformance

2. Methodology
   2.1 Data
   2.2 The Stochastic Simulation Problem
   2.3 Objective Function
   2.4 Baseline Results for S&P 100
      2.4.1 Exploratory Data Analysis (EDA)
      2.4.2 Characteristics of Simugram Weights
   2.5 Constraints
      2.5.1 Alternate Constraint Set (ACS) - Maximum Allocation by Tail Cutoff.
      2.5.2 Alternate Constraint Set (ACS) - Risk Percentile (r*)
      2.5.3 Alternate Constraint Set (ACS) - Minimum return/risk tolerance r_tail
   2.6 Sampling Studies
      2.6.1 SP-100 Multiple Trial Sampling
Appendix C. Transformation Reduction on Nelder Mead Convergence Time 159

Appendix D. Volatility Table for Simugram Sample Returns 160

Appendix E. Graphical Return Summary, SP-100 and SP-500 163

Appendix F. Epilogue: DAC-4 and 2003 Results 165
