

ELEC 533 Homework 1

Due date: In class on Friday, September 14th, 2001

Instructor: Dr. Rudolf Riedi

1. Using the three axioms of probability, prove the following properties of probability.

(a) If $A_1, A_2, \dots \in \mathcal{A}$, and $A_i \subseteq A_{i+1}$, then

$$P\left[\bigcup_i A_i\right] = \lim_{n \rightarrow \infty} P[A_n].$$

(b) If $A \subset B$ then $P[A] = P[B] - P[A^c \cap B]$.

(c) If $A \subset B$ then $P[A] \leq P[B]$. (Use problem (1b).)

(d) If $P[B] > 0$, and $A_i \cap A_j = \emptyset$ for $i \neq j$, then

$$P\left[\bigcup_i A_i \mid B\right] = \sum_{i=1}^{\infty} P[A_i \mid B].$$

2. Verify that the following are valid probability laws. To this end determine whether the underlying probability space is discrete or continuous and use the criteria established in class.

(a) The binomial law ($0 \leq \theta \leq 1$) on $\Omega = \{0, 1, \dots, n\}$

$$P[\{a\}] = \frac{n!}{(n-a)! a!} \theta^a (1-\theta)^{n-a}. \quad (1)$$

(b) The Poisson law ($\lambda > 0$) on $\Omega = \mathbb{N}_0 = \{0, 1, 2, \dots\}$

$$P[\{a\}] = \frac{e^{-\lambda}}{a!} \lambda^a. \quad (2)$$

(c) The exponential law ($\lambda > 0$) on $\Omega = \mathbb{R}$

$$P[(-\infty, y]] = \begin{cases} \int_0^y \lambda e^{-\lambda\tau} d\tau & \text{if } y \geq 0 \\ 0 & \text{if } y < 0. \end{cases} \quad (3)$$

(d) The uniform law on $[a, b]$

$$P[[x, y]] = \frac{y-x}{b-a} \quad b \geq y \geq x \geq a. \quad (4)$$

(e) The following law on $\mathbb{N} = \{1, 2, \dots\}$

$$P[\{n\}] = 2^{-n}. \quad (5)$$

3. Let $\Omega_4 = \{1, 2, 3, 4\}$.

(a) Find the smallest σ -algebra containing $A = \{1, 3\}$.

(b) Find the smallest σ -algebra containing $A = \{1\}$, $B = \{3\}$.

4. Prove that if A and B are independent events, so are A and B^c .

5. A “straight” is the event when all numbers from 1 through 6 are observed when several dice are thrown simultaneously.

(a) What is the probability that a “straight” occurs when six dice are thrown simultaneously?

(b) What is the probability that a “straight” occurs when seven dice are thrown simultaneously?
