Instruction to Authors

Authors should submit the manuscript in four copies to one of the editors. It is a fundamental condition that no manuscript submitted has been or will be published elsewhere in any form or language. Manuscripts will be reproduced directly by a photographic process which excludes the possibility of further alteration. If a paper is unsuitable for reproduction, it will be returned for retyping. It is essential that these instructions be followed with the greatest care.

Manuscripts should be typed or printed in 1 line spacing. Pages should be numbered using a blue crayon. The sections **summary, footnotes, tables and references** must be also in single line spacing: the typing area should under no circumstances be exceeded, but must be used to the full: 11,7 x 18,9 cm.

The manuscript should be set out as follows:

- A 5-cm-wide margin should be left at the top of the first page for the publisher to insert the source data.
- Title of paper.
- Author's name: first name(s), followed by the surname without academic title.
- Author's full postal address.
- Summary (dispensable for short notes), which may be supplemented by key words.
- Text.
- References.

Footnotes should be placed at the bottom of the page to which they refer and should be divided from the text by a horizontal line 2 cm long. They must be inside the typing area.

Figures should either be drawn directly on the manuscript page or on seperate sheets; in the latter case adequate space must be left in the text. Good reproduction is achieved only when the lines are drawn very carefully.

In the body of the text **references** should be quoted with the year of publication in brackets if the name of the author is mentioned in the text, e.g. Smith (1982). Otherwise the name of the authorshould appear in brackets too, e.g. (Smith 1982). All references are to be listed in alphabetical order at the end of the paper.

They should be cited as follows:

- **Journal papers:** names and initials of all authors, year, title of paper, abbreviated title of journal, volume number, first and last page numbers; e.g. Embrechts, P. and Herzberg, A.M. (1991), Variations of Andrew's Plots. International Statistical Review, 59, 2, 175--194.
- **Books:** names and initials of all authors, year, title, edition, publisher, place of publication, e.g. Pfanzagl J. (1973), Theory of measurement, 2nd edn., Physica Würzburg--Wien.

Thirty (30) offprints of each paper will be supplied free of charge; additional offprints can be ordered from the publisher after the paper has been accepted for publication.

As example for the look may serve the following file:

- examcs.ps

This postscript file is produced from the following files:

- examcs.tex
- examcs.bbl

To compile these files, you need the **compstat** and the **harvard** style ! The **examcs.bbl** is generated by BIBTEX.

Submission via E-Mail and Ftp

It is possible to submit a paper as a PostScriptfile or a LaTeX/TeX-file electronically. The following steps are necessary:

- **ftp 141.20.100.2** or **ftp amadeus.wiwi.hu-berlin.de**
- Login as **ftp** or **anonymous**
- Use as password your e-mail address
- Change to the directory compstat with **cd pub/compstat**
- Put your uncompressed file(s) on the server with **put yourfile.tex** or **put yourfile.ps**. You can not look in the directory with **ls** or **dir** !
- Close the connection with **quit**
- Send an e-mail to **compstat@wiwi.hu-berlin.de** and notify us of the file(s) you have put on our server. Please indicate in your e-mail if the communication can be done via e-mail.

Submissions of PostScript- and/or LaTeX/TeX-files can only be accepted under the condition that we are able to print (PostScript) or compile (LaTeX/TeX) them. If a paper is submitted as a LaTeX/TeX-file and contains graphics then the format of the graphics has to be PostScript.

Style file(s) for LaTeX

An example style file for LaTeX 2.0.9 is available:

- compstat.sty
- read.me

The use is demonstrated by

- examcs.tex

which was used to create **exam.ps**.

We would advise you to use the **harvard.sty** for citations and the **epsf.sty** for including PostScript graphics in your text. Both styles are public and available from CTAN servers:

- Heidelberg, Germany (ftp, gopher, e-mail)
- Texas, USA (ftp, gopher, e-mail, NFS, WWW)
- United Kingdom (ftp, gopher, NFS, WWW)

or mirror sites of those archives

in Germany:

- Germany
- Germany
- Bielefeld, Germany
- Stuttgart, Germany
- Saarbrücken, Germany

in Europe:

- Czech Republic
- Estonia
- Paris, France
- France
- United Kingdom

in USA:

- Missouri, USA
- North Carolina, USA
- North Carolina, USA

in Asia:

- Osaka, Japan
- Japan
- Japan
- Taiwan
- Taiwan
- Singapore

in Australia:

- Australia

In order to reduce network load, it is recommended that you use the CTAN host which is located in the closest network proximity to your site.
