SUMMER RESEARCH OPPORTUNITY FOR S/E UNDERGRADUATES

May 18–June 26 and July 6–August 7
Duncan Hall

Topic: Statistical Function Estimation, Image Understanding, and Optimization

- This summer research workshop will provide a general overview of several interesting research areas and does not necessarily require any specific background in these topics.

- A select group of undergraduate and graduate students, visiting faculty, and faculty will collaborate. Projects will come from your interests, faculty interests, and real problems from the Department of Defense. You will be participating in daily seminars and several research projects. There will be ample time for independent and group research.

- You are invited to apply. A stipend of at least $7.50/hour will be awarded to undergraduate participants. Citizenship or permanent residence status required. Please obtain application forms from the web site below. Initial interviews and offers will take place Feb 25–27, March 11, and then after March 15.

- For further information and application forms, contact
  - http://www.stat.rice.edu/rims.html
  - ftp to ftp.stat.rice.edu in pub/scottdw/RIMS
  - Dr. Scott, 2095 Duncan Hall (527-6037)
  - Diane Brown, 1088 Duncan Hall (527-6032)

Supported by the Department of Defense.
